

NAME _____

DATE _____

Listening Game: Fugue BACH Fugue in B-flat Major, BWV 866

WHAT'S THE PATTERN?

Buddy introduces the tune which is repeated again and again throughout the music. He explains that there are two parts that make up this tune. What are they?

1. _____
2. _____

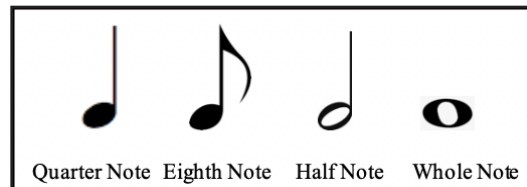

Now, listen again; Buddy shows you the important tune to listen for in music. He plays it all over the piano, so it might sound a little different each time! Listen carefully, and count how many times you hear the tune repeat while he plays the music.

How many times did you hear it? _____

When something is repeated again and again, it creates a **pattern**. How this music repeats the same tune in different parts of the piano is a kind of pattern. The pattern of a piece of music is called form. The form tells us how a piece of music is put together! The form of this music is a **fugue**, in which the main tune is played many times in different parts of the keyboard.

WHAT'S THE PATTERN?

Look at the group of notes in each question. There is a pattern for each group. Draw the correct note that continues the pattern in the last box.
