Starts with a B: Rhythm Game BEETHOVEN 6 Ecossaises, WoO 83

WHAT IS RHYTHM?

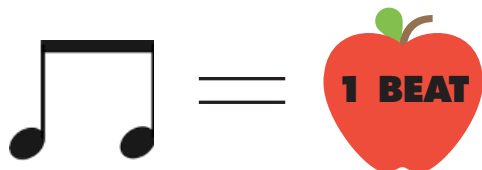

Music has short and long sounds, just like you heard in the video. All of these short and long sounds must have a **steady beat**, like your heartbeat! The combination of short and long sounds with a steady beat creates a pattern, which we call **rhythm**.

Here are some notes that make short and long sounds.

This note is called a **quarter note**; we use **ta** to count this. Each quarter note gets **ONE** beat.

This note value is **two eighth notes**; we use **ti-ti** to count this. Two eighth notes equal **ONE** beat.

HOW MANY BEATS?

Color the apples for the number of beats each example represents.

Three quarter notes =

Two eighth notes =

CLIBURN KIDS

THE CLIBURN

Using "ta" for quarter notes, and "ti" for eighth notes, write out the rhythm above the notes on each line. Then, practice clapping each line with a steady beat!

ta ta ti ti ta

Each group of notes is divided by **bar lines** into **measures**.

a measure

bar line bar line

How many measures are there in the rhythm example above? _____ measures
